PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience specializing in front-end architecture and high-performance web applications. Deep expertise across the Vue.js ecosystem (Vue 2/3, Nuxt) combined with a framework-agnostic approach spanning React, Astro and Angular. Proven track record leading large-scale modernizations — JavaScript-to-TypeScript migrations, Vue 2→3 upgrades and Nuxt→Astro transitions — and designing reusable component libraries that improve developer experience and delivery speed. Strong advocate of TDD and automated testing (Cypress, Jest), with solid REST and GraphQL integration experience. Comfortable working across the stack, picking up back-end tasks with Node.js, Express and MongoDB whenever the project requires it.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), Vue.js (2/3, Composition & Options API), Nuxt, React, Astro, Angular

Architecture & Performance: Component library & design-system design, SSR / SSG rendering, rendering optimization, modular front-end architecture

Back-end (working knowledge): Node.js, Express, MongoDB; able to take on back-end tasks and improvise across the stack — plus earlier exposure to PHP / Laravel

Testing & Quality: Test-Driven Development (TDD), Cypress (E2E), Jest (unit), Storybook

APIs & Integration: RESTful APIs, GraphQL

Cloud & DevOps: AWS — CodePipeline, CloudFront, S3, Route 53, CloudWatch; Firebase; CI/CD pipelines

Tooling & Other: Git, Figma, VTEX IO, Highcharts

PROFESSIONAL EXPERIENCE

Web Developer — Parcelex · Jan 2023 – Present

Fintech

- Led the migration of legacy systems from Vue 2 to Vue 3 and introduced TypeScript across the codebase, enforcing strict type safety and significantly reducing runtime errors.
- Architected a unified, scalable package of shared UI components, scripts and typings for multi-project use, establishing a single source of truth and increasing cross-team code reuse.
- Drove the architectural transition from Nuxt to Astro, implementing SSR/SSG rendering to remove long-standing performance bottlenecks and deliver faster page loads.
- Built a custom React component library from scratch for the VTEX IO e-commerce platform, creating a unified design language and enabling the team to extend customization autonomously.
- Owned front-end deployment and delivery on AWS (CodePipeline, CloudFront, S3, Route 53) with CloudWatch monitoring, maintaining reliable CI/CD pipelines and enforcing code standards across repositories.

Frontend Developer — Clicksign · Oct 2021 – Dec 2022

SaaS / Digital signatures

- Engineered complex, high-performance interfaces with Vue.js (Composition & Options API) and TypeScript for demanding business flows.
- Championed a test-driven culture, implementing end-to-end automated testing with Cypress and extensive unit testing with Jest.
- Built and maintained a visual styleguide in Storybook, bridging design and development, accelerating delivery and ensuring UI consistency.

Frontend Developer — WeDev Tecnologia · Dec 2020 – Nov 2021

Fintech

- Developed and maintained scalable white-label CRUD applications in Vue.js 2, designed for flexible, outsourced deployment.

- Authored technical documentation of complex front-end / back-end integrations, streamlining onboarding and ongoing maintenance.
- Ensured component reliability through rigorous unit testing with Jest.

EARLY CAREER

Web Developer (Internship) — Top Trader · Aug 2019 – Dec 2020

Fullstack work with Nuxt/Vue (front-end) and Laravel (back-end); interface prototyping in Figma and Jest unit testing.

Web Developer (Internship) — Federal University of Pará (UFPA) · Aug 2018 – Aug 2019

Analytical dashboards with Vue.js and Highcharts (PHP back-end) and automated report generation.

Front-End Developer (Internship) — CEAMAZON / UFPA · May 2017 – Aug 2018

Java/JavaFX desktop and mobile apps with XML and back-end integration for FAPESPA and the State of Amapá electricity company (CEA).

EDUCATION

B.Sc. in Computer Engineering — Universidade Federal do Pará (UFPA) · 2016 – 2022

Postgraduate (Lato Sensu), Full Stack Development & Cloud Computing — GRAN · 2025 – 2026

Postgraduate, Software Engineering in Applied AI — UNIPDS (in progress) · 2026 – 2027

LANGUAGES

Portuguese (Native) · English (Professional Working)
